Rhombus: First level price model, in plastic
Adjustment of the angle from 85° to 90° by half degree
Uses smaller and less expensive stones than other Snowglide Machines
Delivered with a R46 Ceramic stone, a 100/240V power supply and a plastic box
Gives the same finish than other Snowglide but takes a little more time to do it
Public Price 850.00 Euro TTC

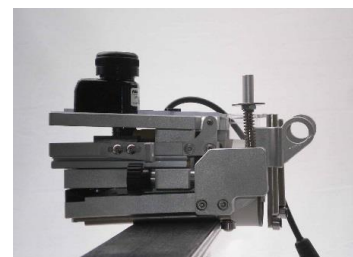

AF-C: compact model, the most sold in clubs
http://www.snowglidetools.com/en_afc.php
Adjustment of the angle from 86° to 90° by half degree
Uses same stones than World Cup machines
Delivered with a ceramic L46 stone, a 100/240V power supply and a transport bag
Public Price 1650.00 Euro TTC

AF-L: the most used in World Cup
http://www.snowglidetools.com/en_afl.php
Angle adjustable continuously between 84° and 90°
Can use all the World Cup stones for lateral side
Delivered with a ceramic L46 stone, a 100/240V power supply and a transport bag
Public Price 2370.00 Euro TTC

AF-1: Designed for laboratory that have machine to regrind bases but not a good machine for base bevel.
http://www.snowglidetools.com/en_af1.php
Can work one per time, the base side and the lateral side.
Angle adjustable continuously between 84° and 90°
Can use all the World Cup stones for lateral side and the stones for base bevel.
Delivered with a ceramic L46 stone, a 100/240V power supply and a transport bag.
Public Price 2870.00 Euro TTC

On lateral side, an "L" stone can work 200 pairs of skis. An "R" only 100.

Different stones:

LCR: Pink corundum stone for roughing 43.00 Euro
All ceramic stones type "L" 264.00 Euro TTC

L30: for manmade snow or speed races

L40: The most used in World Cup, skiable directly after machine, but a little longer to set the ski sharp than the L46

L46: The most polyvalent, make a little bur that can easily be taken off with Arkansas stone.

L91: for very icy hill like indoor. Can be used for roughing.

L252: ceramic stone for roughing, better result than LCR

For Rhombus, "R" stones are at 144.00 Euro TTC

R46: Standard for Rhombus

R91: ceramic stone, can be used for roughing or for very icy hills
